

Rubricate PLUS Senior

- is a uniquely South African educational product – a suite of computer programmes devised by a practising teacher, for use by high school teachers to plan and design innovative assessment strategies, create a variety of assessment tools and manage the assessment process;
- facilitates the planning and design of innovative and integrated assessment strategies for the classroom;
- guides key decision-making required to ensure that classroom assessment is effective and successful;
- through Rubricate + Design produces a printed Teacher Assessment Task Plan and a correlated Learner Task Guide for each assessment task;
- through Rubricate + Create creates a variety of customised assessment tools like anecdotal records, checklists, rating scales, performance list and holistic and analytic rubrics;
- enables evaluation of specific created assessment tools to promote self-reflection and growth and development of professional skills;
- provides easy curriculum support through on-screen access to the current educational policy;
- Own Entries function can be used to enlarge and customise the database and export and import facilities to share own entries with others, allowing for load-sharing and teacher-mentoring;
- interfaces with Microsoft Word and Excel to allow for further customisation and compatibility with other educators who don't have the Rubricate PLUS program;
- provides a means of managing the assessment process by collecting learner achievement on levels or percentages;
- through Rubricate + Record, produces Assessment Records to track learner progress, provide continuous feedback and to report summatively at the end of a school term or year.
